sound system 聲響創作體驗

User Guide 操作指南

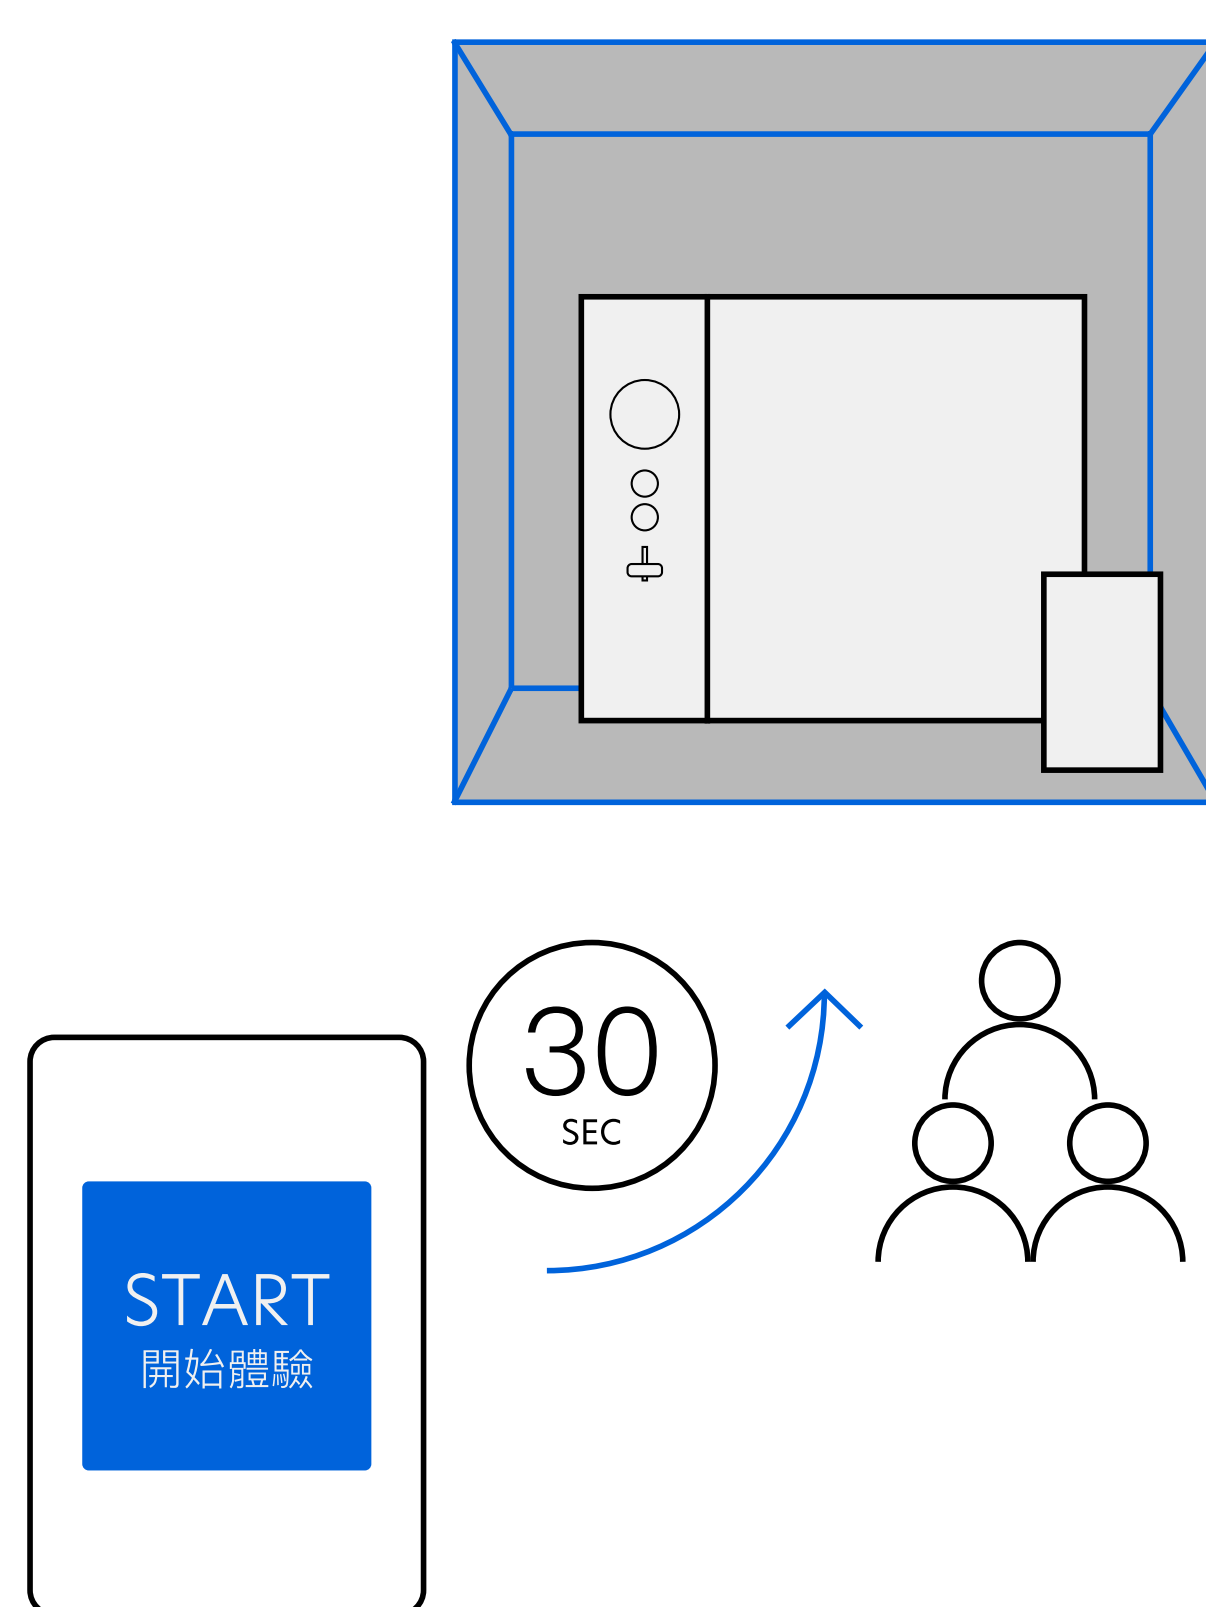

How It Works

Each session accommodates up to 3 people and lasts 3 minutes.

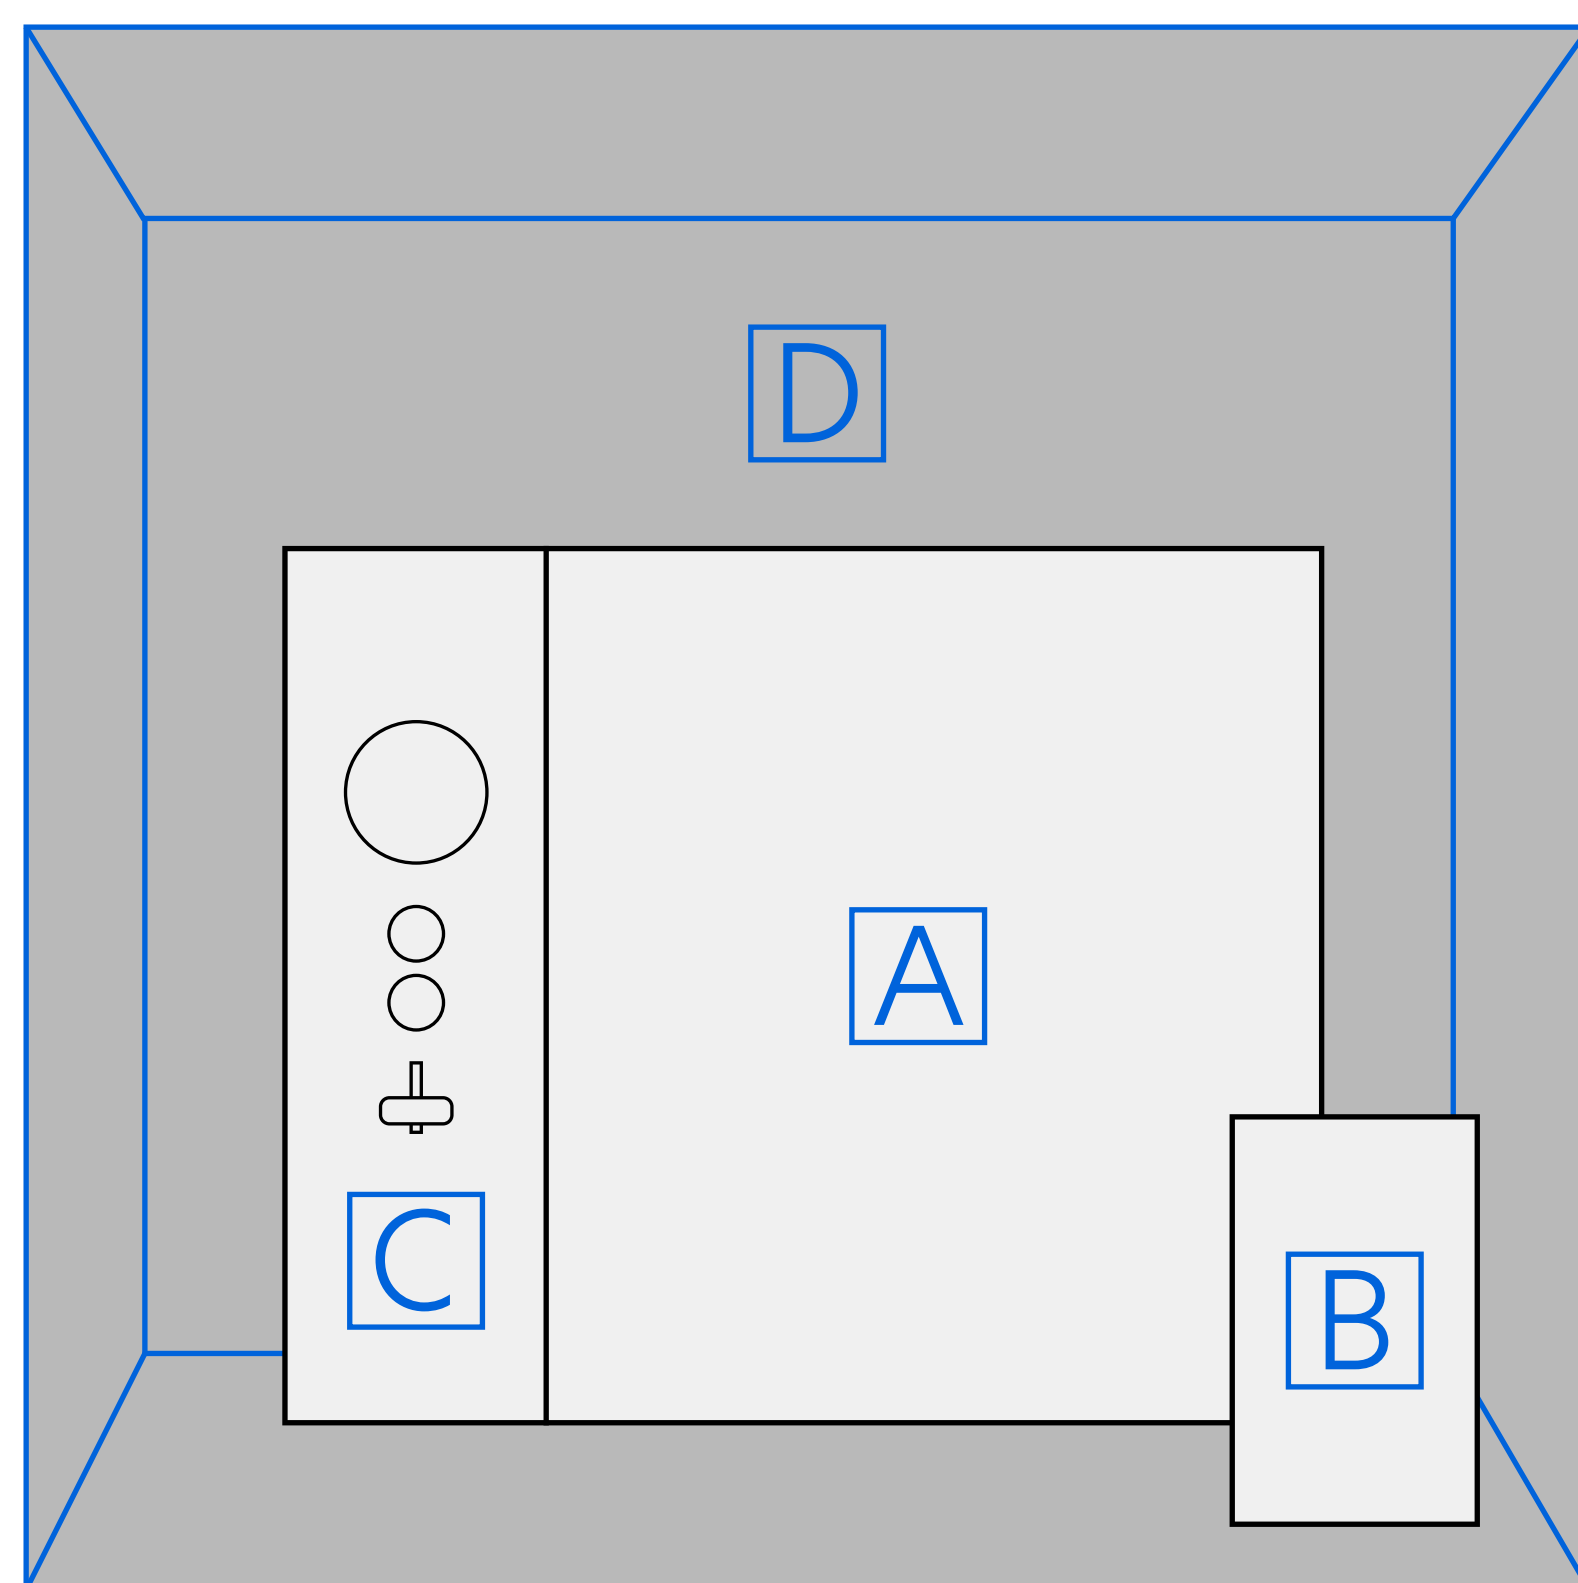

Getting Started

- ① Before you begin, please read the user guide and confirm that you agree to follow these guidelines.
- ② The timer starts when you press “START.” Please enter the Sound Box promptly.
- ③ Follow the on-screen instructions to begin your experience.
- ④ When the countdown ends, the installation will automatically begin recording.

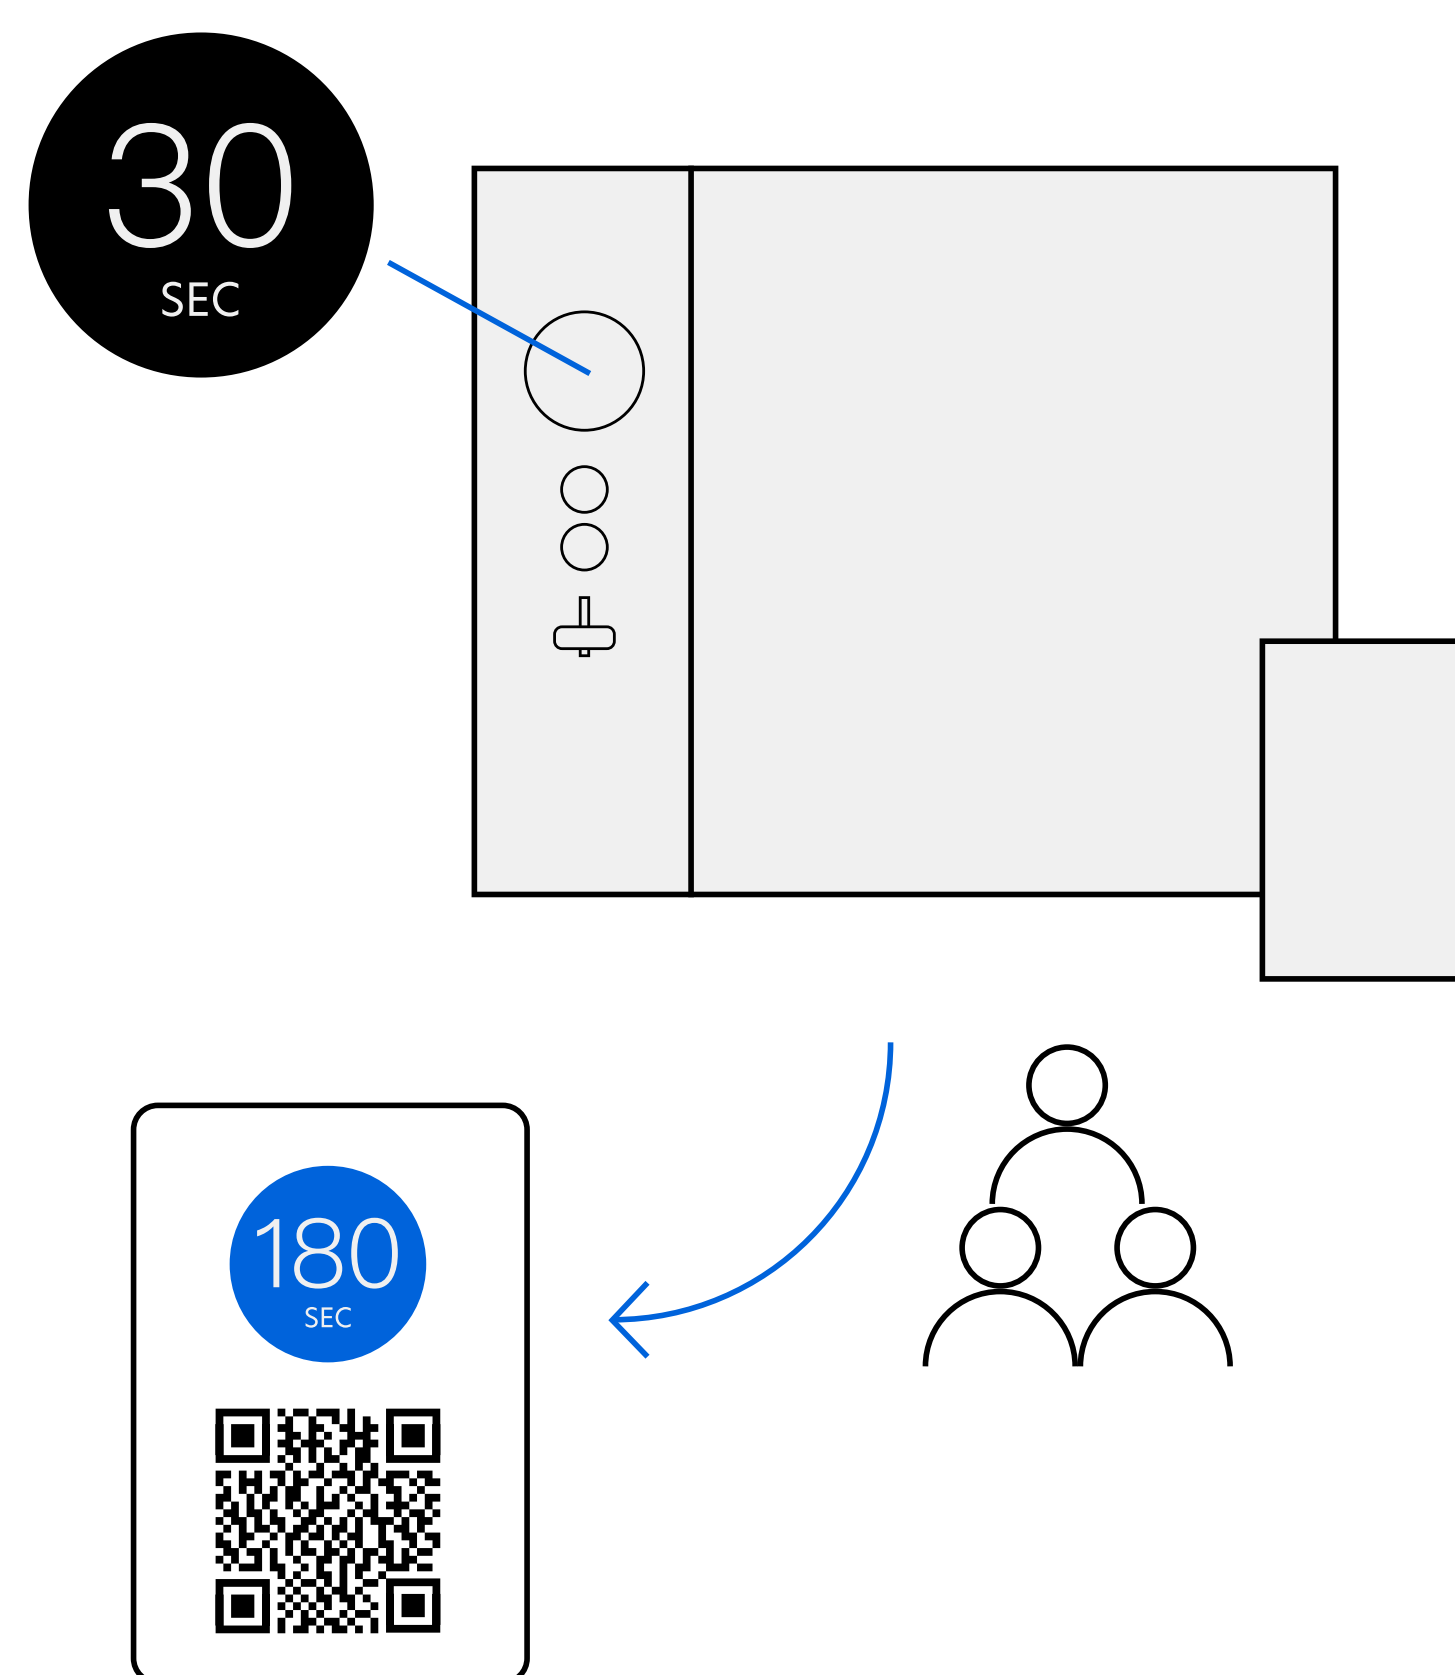

Sound Exploration

- A** Da Piano & **B** Noise Box: Use both hands to explore freely. The sounds you create will be recorded in real time and played back on a loop.
- C** Field Drum: Turn the knobs to switch between different scenes and effects. Move the slider to adjust the pitch and rhythm of the overlapping sounds.
- D** Field Sound: As you explore the sounds inside the Sound Box, notice the environmental sounds from outside the museum, continuously brought into the Sound Box in real time.

Completing Your Experience

- ① The countdown on the screen indicates that recording is complete. Please get ready to leave the Sound Box.
- ② Please exit before the countdown ends, then scan the QR code outside to download your creation.
- ③ Each download link remains active for 3 minutes. Please save your work before it expires.

Please note:

- Use both hands: Please use both hands to explore. Do not use any objects to hit the installation.
- Be gentle: Please be mindful of the force you use.
- Keep it personal: Created content is for personal use only and may not be used for commercial purposes.
- Engage your senses: Experience “seeing sound, hearing time” and let your creativity flow.
