利用空間與色光，形塑整體氛圍，將臺灣各地鐵窗花的意象，簡化為最單純的形式。藝術家吳芊頤實際走訪臺灣各城市巷弄，搜集分類各鄰里的特色窗花圖像，將鐵窗風景截取一塊可見的範圍，呈現不同視角下的窗景符號，再使用色塊拼貼與平面繪畫的方式組構成一幅幅有機的窗景。

創作拼貼時，直覺的調配空間比例，使用透明介面的光與影營造出獨特的空間感，透過此藝術語彙與時代做連結，並以此觀看上的趣味，喚起屬於日常文化的臺式鄉愁。

Artist WU Chien-yi uses space and light to form different atmospheres. She simplifies old Taiwanese window bar patterns into pure forms. Her practice includes visiting side streets throughout Taiwan to gather distinctive window bar patterns from different neighborhoods. She selects cropped views of windows and window bar designs and adapts them from different perspectives. She then collages these with painting to create organic variations in her imagery. Creating these collages, she intuitively adjusts spatial proportions and uses a translucent medium to present light and shadow that construct a unique spatial sense. The artist combines art language and symbols of a specific era to elicit nostalgia for everyday Taiwanese culture.

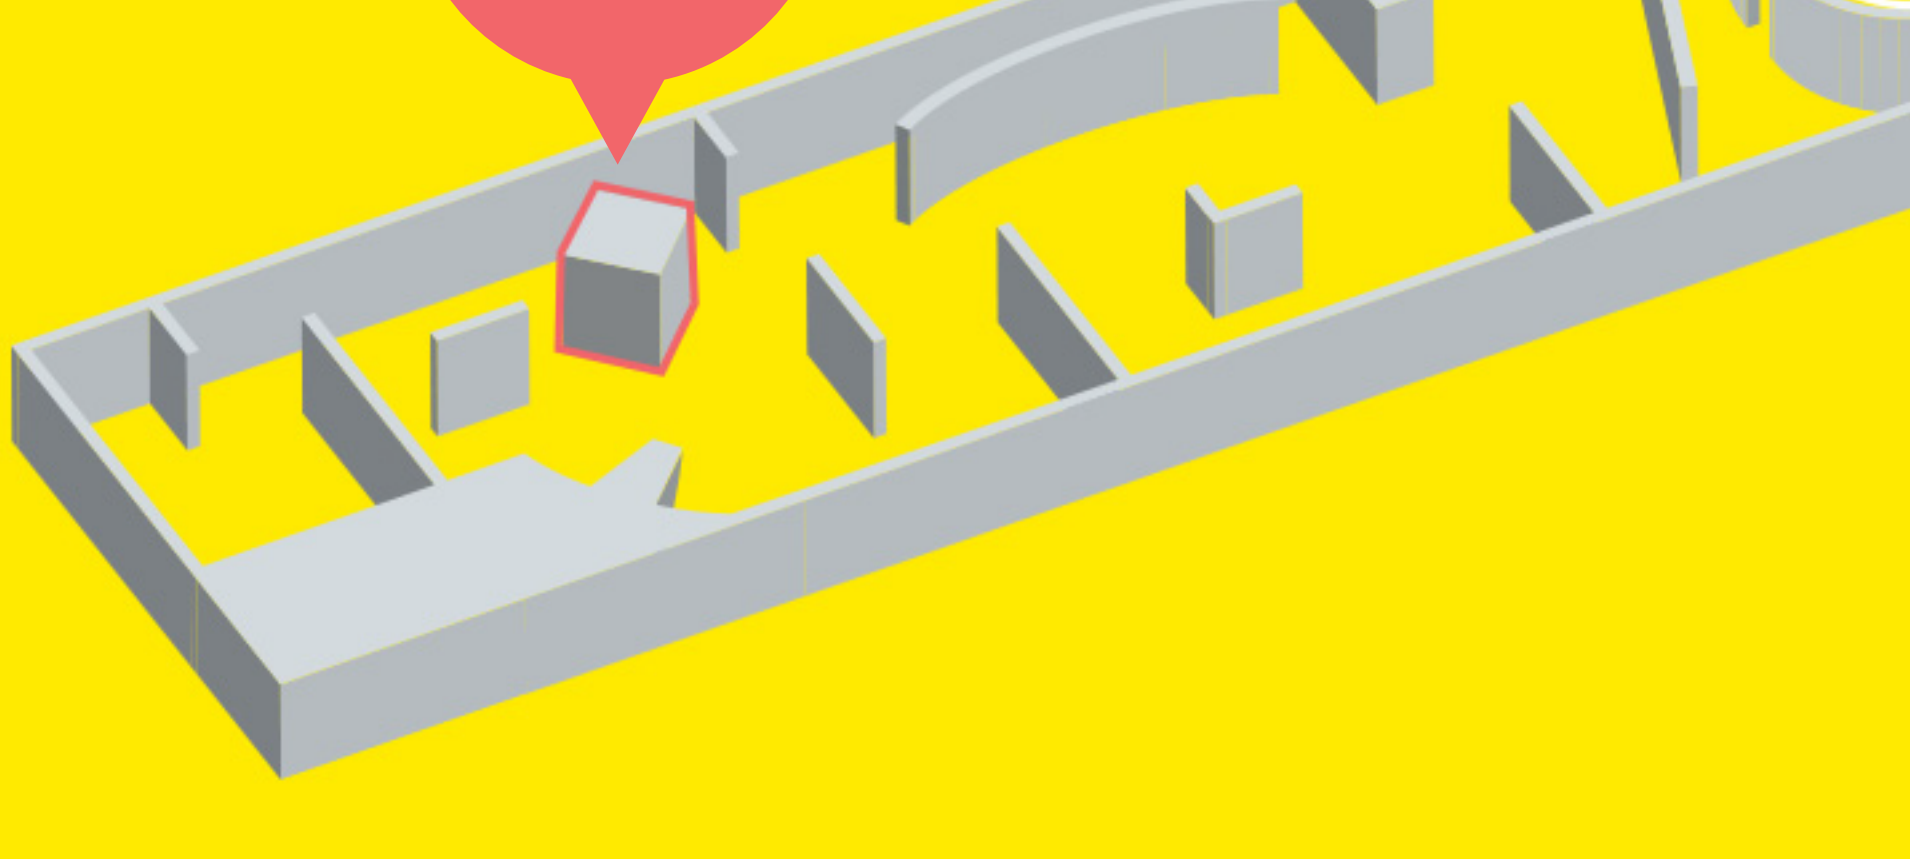

MY RESPONSES

你有發現鐵窗是一種獨特的居住景色嗎？藝術家實際考察了各地的鐵窗窗花後，再拼貼創作，你也可以觀察住家或學校附近的窗景，看看當中有沒有吸引你目光的造型？可以試著畫畫看喔！

Have you noticed the window bars on buildings in Taiwan's residential areas? Did you know that they are a unique feature of Taiwan's residential scenery? The artist first made on-site studies of different window bar patterns, and then collaged them. You can also find window bars near your home or school. See if any of their forms attract your attention and then try to draw them!
